COJP/EAJ5/20	English language V.
COJP/ENJ1/18	German language I.
COJP/ENJ2/18	German language II.
COJP/ENJ3/19	German language III.
COJP/ENJ4/19	German language IV.
COJP/ENJ5/20	German language V.
COJP/ERJ1/18	Russian language I.
COJP/ERJ2/18	Russian language II.
COJP/ERJ3/19	Russian language III.
COJP/ERJ4/19	Russian language IV.
COJP/ERJ5/20	Russian language V.

Course description - Fundamentals of Ethics

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/ZE/10	Course title: Fundamentals of Ethics (compulsory, profile)
Type, scope and method of educational activity: lecture/seminar 2/1 per week on-campus	
Number of credits: 6	
Recommended semester: 1.	
Cycle of study: 1.	
Prerequisites:	
Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. Part of the assessment is to evaluate student activity and participation in the exercises and the final oral exam. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: activity and participation of students in exercises (20%) oral exam (80%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.	
Learning outcomes:	
Acquired knowledge: The educational result of the teaching subject is to familiarize students with an orientation in matters of ethics, the distinction between ethical and non-ethical spheres. The way out is also the ability of students to understand the development of ethics in an individual historical aspect, to know the main ethical categories and their value essence, to find internal motivational sources of behavior, to cultivate and develop empathy. Last but not least, the student will navigate the basic ethical principles and categories, understand the difference between individual approaches, and become familiar with the main methodological and substantive principles of the subject.	
Acquired knowledge: Have an expanded knowledge with an ethical focus, distinguishing between ethical and non-ethical areas. To know and understand the development of ethics in the individual-historical aspect, to know the main ethical categories and their value essence.	
Acquired skills: Understand the difference in individual approaches and navigate the main methodological and substantive principles of the subject. Get an idea of the structural essence of the entire spectrum of ethics (metaethics, axiology, philosophical ethics, applied ethics). Acquired	
Acquired competences: Acquires the capacity for empathy. Find internal motivational sources of behavior, cultivate and develop empathy. He acquires the ability to distinguish between ethically significant and irrelevant phenomena. He will achieve the competence to evaluate ethical phenomena.

Course description Philosophy of Education

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/FV/10	Course title: Philosophy of Education (compulsory, profile)
Type, scope and method of educational activity: lecture/seminar 2/1 per week on-campus	
Number of credits: 6	
Recommended semester: 3.	
Cycle of study: 1.	
Prerequisites:	
<p>Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. Part of the assessment is a semester's work according to the teacher's assignment, an assessment of the students' activity and participation in the exercises, and a final oral exam. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: semester's work (20%) activity and participation of students in exercises (20%) oral exam (60%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.</p>	
<p>Learning outcomes: The purpose of the training is to familiarize students with the development of philosophical and pedagogical thinking in Europe in the historical context and the present. The student will get acquainted with the philosophical images of man and the philosophical starting points of education in a historical context, especially with the anthropological, social, axiological and global contexts of education. At the same time, the student will be able to analyze and highlight the influence of philosophical thinking on upbringing and education in certain historical periods. He will also be able to evaluate the philosophical foundations of education and understanding of man from the point of view of philosophical and pedagogical anthropology.</p> <p>Acquired knowledge: The student will acquire knowledge across the entire historical range of philosophical and pedagogical thinking. An added benefit is the adoption of a conglomerate of different educational philosophies. Thus, he will get a general idea of a person from the point of view of pedagogical anthropology.</p> <p>Acquired skills: The student will acquire skills that will allow him to distinguish between individual historical concepts of the philosophy of education. He can combine knowledge from philosophy and pedagogy into one consistent whole. He acquires the ability to assess the development of a person from the individual points of view of the pedagogical and philosophical approach.</p>	

Acquired competences:

The student will acquire the ability of educational imagination in the sense of empathy with a person as part of his gradual learning. He will also acquire the competence of understanding the issue of possible problems in education.

Course content:

Introduction to the problem. The relationship of philosophy, philosophical anthropology and pedagogy.

Image of a person. Anthropological paradigms.

Myth with mythology. Beginnings of philosophy.

Greco-ancient philosophy and its influence on education.

Roman view of educational activity.

Man and Education in the Judeo-Christian Tradition.

Modern thinking and education. Pedagogical directions of the 19th and 20th centuries.

Man and education in a globalized world.

Course description Aesthetics and Etiquette

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/EE/10	Course title: Aesthetics and Etiquette (compulsory, non-profile)
Type, scope and method of educational activity: lecture/seminar 2/1 per week on-campus	
Number of credits: 6	
Recommended semester: 4.	
Cycle of study: 1.	
Prerequisites:	
<p>Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. Part of the assessment is a semester's work according to the teacher's assignment, an assessment of the students' activity and participation in the exercises, and a final oral exam. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: semester's work (20%) activity and participation of students in exercises (20%) oral exam (60%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.</p>	
<p>Learning outcomes: The educational outcome is to provide students with an overview of the function of aesthetics and etiquette and also to provide materials for understanding the construction of an aesthetic work and a work of etiquette and for reflection on the course of aesthetic perception. At the same time, the teaching subject should lead students to a full awareness of the meaning of cultural products for the harmonious development of a person.</p> <p>Acquired knowledge: The student learns about the development of aesthetic perception from antiquity to the present day and learns the role of aesthetics in the sensory perception of the world. Gain knowledge about the basic terms and categories of aesthetics. Familiarize yourself with the application of aesthetic terminology in various fields of art. He studies the nature, causes, patterns and significance of aesthetic phenomena as a result of the aesthetic and artistic exploration of the world. The correlation between ideology, art and aesthetics is discussed, theoretically a distinction is made between high and mass art. He explores art in relation to emotion as well as in relation to reality. He studies etiquette as one of the areas of aesthetics in everyday life.</p> <p>Acquired skills: After graduation, the student will be able to navigate basic aesthetic terms and categories. He thinks about the value of art, examines works of art, perceives aesthetic phenomena in nature, can make aesthetic judgments, characterize the main categories and kitsch. He masters the basic principles of secular etiquette, which he can apply in his personal and professional life.</p> <p>Acquired competences:</p>	

Learner-acquired competencies include the mental prerequisites for appreciating the meaning and role of art in everyday life. Acquires the ability to perceive and evaluate aesthetic categories. He observes the differences between high art, kitsch and erotic art, the extreme positions of aesthetics and at the same time the aesthetics of everyday life and its expression in design.

Course content:

Introduction to the subject of study.
The meaning of aesthetics. The meaning of the etiquette.
The relationship between aesthetics and etiquette.
Three paradigms in the history of philosophical and aesthetic thinking.
Aesthetic function. An aesthetic norm.
Aesthetic value. Aesthetic perception.
Etiquette as a system of cultural aesthetic - ethical behavior.
Applied etiquette. Case studies.

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/DEII/11	Course title: History of Ethics II (compulsory, non-profile)
Type, scope and method of educational activity: lecture/seminar 2/1 per week on-campus	
Number of credits: 6	
Recommended semester: 4.	
Cycle of study: 1.	
Prerequisites:	
<p>Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. The assessment includes an assessment of the students' activity and participation in the exercises, a written test and a final oral exam. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: activity and participation of students in exercises (10%) written test (20%) oral exam (70%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.</p>	
<p>Learning outcomes: The student can explain the essence of philosophy and ethics in the period of the Renaissance, modern empiricism, rationalism and the Enlightenment. He knows the practical philosophy of I. Kant, as well as the philosophy and ethics of the end of the 18th century (Fichte, Hegel, Schelling...). Can explain the essence of ethics in German classical philosophy, in positivism, in voluntarism, in utilitarianism, in pragmatism and in existentialism; can analyze L. Wittgenstein's ethics and MacIntyre's ethics of virtue; to compare Catholic ethics and Protestant ethics.</p> <p>Acquired knowledge: The student is introduced to the most important representatives of the history of ethical theories from the early modern times to the present day. It draws on high school knowledge. The subject of knowledge is various ethical theories and representatives of ethics up to the contemporary living ethical thinkers.</p> <p>Acquired skills: The student will receive an orientation in a range of ethical theories from the present to the present. The student is guided in the sense of the ability to interpret the most significant ethical works of the period under consideration. He can interpret the ethical texts of the focal ethicists from the mentioned section of the history of ethical theories.</p> <p>Acquired competences: The student will strengthen his ability to tolerate ethical opinions of various, often conflicting origins. He will improve his ability to argue based on ethical arguments from the history of</p>	

ethics. Takes an active approach to ethical reasoning.

Course content:

Modern empiricism - philosophy and ethics.

Modern rationalism - philosophy and ethics.

Ethics and morality in the period of enlightenment (Rousseau, Voltaire).

Practical philosophy of I. Kant. Philosophy and ethics at the end of the 18th century (Fichte, Hegel, Schelling...).

Philosophy of history and the problem of morality in the "historical-materialist conception of K. Marx and F. Engels.

Understanding of philosophy and ethics in classical positivism (A. Comte, J. St. Mill).

Philosophy and issues of morality in F. Nietzsche's voluntarism ("will to live", "will to power", "ideal of the superman", "reevaluation of all values", "idea of eternal return").

Utilitarianism. Pragmatist ethics (Peirce, James).

Existentialism and "existentialist ethics" (Sartre, Jaspers, Camus).

Analytical ethics (L. Wittgenstein).

Virtue ethics (MacIntyre).

Catholic ethics. Protestant ethics.

Course description Philosophical Anthropology

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/FA/10	Course title: Philosophical Anthropology (compulsory, non-profile)
Type, scope and method of educational activity: lecture/seminar 2/1 per week on-campus	
Number of credits: 6	
Recommended semester: 5.	
Cycle of study: 1.	
Prerequisites:	
<p>Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. Part of the assessment is a semester's work according to the teacher's assignment, an assessment of the students' activity and participation in the exercises, and a final oral exam. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: semester work (20%) student activity during exercises (20%) final oral exam (60%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.</p>	
<p>Learning outcomes: The educational outcome is the mastery of the content focus of the subject, the acquisition of knowledge in the field of philosophical understanding of man in history and in the present. The output is also the ability to present one's own opinion and at the same time tolerantly respect the opinions of others and the acquisition of pluralism of interpretations. Finally, the ability to create a conceptual map and to analyze and present the acquired knowledge at an appropriate level.</p> <p>Acquired knowledge: The student acquires knowledge from the entire range of the history of philosophy, including Indian and Chinese philosophy, in the sense of focusing on the history of philosophical anthropology. The knowledge side of the subject thus consists in obtaining an overview of the history of philosophical anthropology with an emphasis on its most important representatives.</p> <p>Acquired skills: The student can reliably orientate himself within the framework of relevant thinkers in anthropological views. Can identify an anthropological philosophical opinion position. He can interpret the philosophy of various important philosophical anthropologists, including basic anthropological philosophical works.</p> <p>Acquired competences: The student will strengthen his competences to work in an environment that is value- and interculturally heterodox. He will also acquire the competence to identify problems based on</p>	

the different understanding of the essence of man in various anthropological-philosophical positions, linked to some geographical areas of the world.

Course content:

Definition of Philosophical Anthropology as a "borderline" philosophical discipline (distinguishing Philosophical Anthropology from Psychology, Sociology, Theology and other disciplines dealing with man).

The beginnings of philosophical interest in human issues (sophists and Socrates).

Man in the work of Plato and Aristotle).

Man as "Imago Dei" (Aurelius Augustinus and Thomas Aquinas).

Reflections of man in Renaissance philosophy.

Man as a "subject of knowledge" in the works of R. Descartes and J. Locke.

The understanding of man in Enlightenment philosophy (Man as a "citizen").

Man in the views of K. Marx and F. Engels. Man and "superman" in F. Nietzsche's voluntarism.

Man as a "temporal being" ("Dasein" in M. Heidegger's work). Man in Christian philosophy of the 20th century.

Course description Fundamentals of Economics

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/ZEK/20	Course title: Fundamentals of Economics (compulsory, non-profile)
Type, scope and method of educational activity: lecture 2 per week on-campus	
Number of credits: 2	
Recommended semester: 5.	
Cycle of study: 1.	
Prerequisites:	
<p>Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. Part of the evaluation is the evaluation of the students' activity at the lectures and the graded credit in the form of a written exam. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: activity and participation of students in exercises (20%) written exam (80%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.</p>	
<p>Learning outcomes: The learning outcome is the mastery of the main economic categories, understanding of economic phenomena and processes in their context, with an emphasis on the conditions of a market economy and the features of its functioning in Slovakia, with an emphasis on applying the acquired theoretical knowledge at the micro level - individual markets, households, enterprises and factor markets production. The result of the training will also be the acquisition of macroeconomic concepts, understanding and substantiation of the relationship of economic phenomena and processes at the national economic level and the ability to analyze them.</p> <p>Acquired knowledge: The student will gain basic knowledge of economics not only in terms, but also within mutual contexts. He will understand the basic connections between microeconomics and macroeconomics, as well as the connections between the ideas of major economists. He will also acquire basic knowledge in the field of the national economy. He is aware of the main difference between microeconomics and macroeconomics, realizing that this difference is qualitative, not quantitative.</p> <p>Acquired skills: The student is studying economic terminology. The student is guided in the main problems of microeconomics and macroeconomics. The student can use the acquired knowledge in the framework of taking a position in relation to specific economic processes. The student can analyze economic phenomena in the state.</p> <p>Acquired competences:</p>	

The student acquires elementary economic literacy (inflation, bank interest rate, state budget, GDP, etc.). The student can apply the acquired knowledge in any micro-enterprise. The student will get an idea of the economic dimension of reality.

Course content:

Introduction to economic theory. Fundamentals of the market mechanism and elements of the market.

Analysis of supply and demand. The consumer (household) and his decision-making.

The company and its position in competitive conditions. Factor markets - their common and different features. Income and its distribution.

Macroeconomic goals and balance sheet. Economic efficiency and its measurement.

Consumption, savings and investment. State economic policy, its goals and instruments.

Inflation and its solution. Unemployment, forms, causes and employment policy. Banking system and money. Economic growth and economic cycle.

International economic relations and integration processes.

Course description for the final state exam subject General Philosophy and Ethics

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/KSV/VFaE/20	Course title: General Philosophy and Ethics (final state exam subject) (compulsory, non-profile)
Type, scope and method of educational activity: on-campus	
Number of credits: 7	
Recommended semester: 6.	
Cycle of study: 1.	
Prerequisites: a student has to earn the required number of credits	
Conditions for passing the course: The state exam shall be taken before the Commission for State Examinations. The conduct of the state examination and the announcement of its results are public. The decision of the Commission for State Examinations on the results of the State Examination shall take place at a closed meeting of the Commission for State Examinations. The state exam consists of the subjects set by the respective accredited study programme and the defence of the bachelor thesis. Each state exam item is classified with a specific grade. Each part of the state examination is assessed separately. The individual parts of the state examination are graded A to FX. The overall grade of the state examination is calculated from the average of the grades of the individual items of the state exam and the grade from the defence of the bachelor thesis. The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.	
Learning outcomes: The student demonstrates the level of knowledge he acquired during his studies and the ability to use this knowledge creatively in practice. From the content point of view, it presents a systemic view, the interconnectedness of the individual professional teaching subjects of the Philosophy study department and the complexity of the understanding of the subject matter in the context of knowledge from general philosophy and ethics and their history.	
Acquired knowledge: The student can analyse and evaluate the current state of theoretical knowledge in philosophy and ethics, independently and creatively use the theoretical knowledge of philosophy and ethics as a methodological platform for moral reasoning and evaluation, synthesize and apply the acquired theoretical knowledge, knowledge and competences to real problems of social practice.	
Acquired skills: The student can present and defend his/her position in terms of an evaluation of a specific area from the disciplines of philosophy and ethics.	
Acquired competences: The student is able to demonstrate his/her linguistic and professional culture and his/her own attitude towards professional problems in the disciplines of philosophy and ethics.	
Course content: 1. Definition of the term philosophy (philosophy and myth, philosophy and logos, image of mythical and post-mythical man) 2. The period of early Greek philosophy and ethics (Miletian, Pythagorean, Ephesian and Eleatic schools, Sophists)	

3. Classical Greek philosophy and ethics (Socrates, Plato and Aristotle)
4. Philosophy and ethics in the Hellenistic period (Epicureism, Stoicism and skepticism)
5. Medieval philosophy and ethics (Patristics and Scholasticism)
6. Renaissance philosophy of nature - G. Bruno, philosophy of the state and law - Machiavelli
7. Modern philosophy - rationalism (R. Descartes, B. Spinoza and G. W. Leibniz)
8. Philosophy of modern empiricism (John Locke, David Hume and Georg Berkeley)
9. Modern ethics (F. Bacon, T. Hobbes, J. J. Rousseau)
10. German classical idealism (G.W.F. Hegel, I. Kant and J.G. Fichte)
11. Utilitarianism (J. Bentham and J.S. Mill)
12. Ethics of positivism (A. Comte and H. Spencer)
13. Philosophy of the 20th century - basic initiatives and characteristics of individual directions.
14. Philosophical anthropology, its place in the structure of philosophy and human sciences (differentiation from biology, psychology, medicine, etc.)
15. Man as a spiritual and social being in ancient and medieval philosophy (man as zoon politikon, Socrates, Plato, Aristotle, A. Augustinus)
16. Philosophical ideas about man in the 20th century (existentialism, pragmatism, religious philosophy)
17. The structure of philosophy (the place of ontology, epistemology, logic, axiology and anthropology in the system of philosophy)
18. Definition of the term ethics. Division of ethics according to the object to which it is devoted. Division of ethics according to the angle of its practical meaning and the angle of its focus.
19. Definition of the concept of morality. The structure of morality. Functions of morality. Principles of morality.
20. Meaning and role of ethics. Basic ethical principles. Code of ethics.
21. Ethics of responsibility (M. Weber, H. Jonas, K. O. Apel, E. Lévinas, H. Kung)
22. Phenomenological ethics of values (M. Scheler, N. Hartmann, D. von Hildebrand)
23. Ethics of pragmatism (Ch. S. Peirce, W. James, J. Dewey, R. Rorty)
24. Ethics of virtue and the good life in the history of ethical thought (Plato, Aristotle, A. MacIntyre, Ch. Taylor)
25. Characterize ethics and the concept of man in Christian philosophy of the 20th century (K. Wojtyła, J. Robinson, N. Berd'ajev / N.O. Losskij)

Course description for the final state exam subject Economic and Business Ethics

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/KSV/HaPE/20	Course title: Economic and Business Ethics (final state exam subject) (compulsory, non-profile)
Type, scope and method of educational activity: on-campus	
Number of credits: 7	
Recommended semester: 6.	
Cycle of study: 1.	
Prerequisites: a student has to earn the required number of credits	
Conditions for passing the course: The state exam shall be taken before the Commission for State Examinations. The conduct of the state examination and the announcement of its results are public. The decision of the Commission for State Examinations on the results of the State Examination shall take place at a closed meeting of the Commission for State Examinations. The state exam consists of the subjects set by the respective accredited study programme and the defence of the bachelor thesis. Each state exam item is classified with a specific grade. Each part of the state examination is assessed separately. The individual parts of the state examination are graded A to FX. The overall grade of the state examination is calculated from the average of the grades of the individual items of the state exam and the grade from the defence of the bachelor thesis. The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.	
Learning outcomes: The student demonstrates the level of knowledge he acquired during his studies and the ability to use this knowledge creatively in practice. From the content point of view, it presents a systemic view, the interconnectedness of the individual professional teaching subjects of the Philosophy study department and the complexity of the understanding of the subject matter in the context of knowledge from applied (economic and business) ethics and their history. Acquired knowledge: The student can analyse and evaluate the current state of theoretical knowledge in applied (economic and business) ethics, independently and creatively use the theoretical knowledge of philosophy and ethics as a methodological platform for moral reasoning and evaluation, synthesize and apply the acquired theoretical knowledge, knowledge and competences to real problems of social practice. Acquired skills: The student can present and defend his/her position in terms of an evaluation of a specific area from the disciplines of applied (economic and business) ethics and their history. Acquired competences: The student is able to demonstrate his/her linguistic and professional culture and his/her own attitude towards professional problems in the disciplines of applied (economic and business) ethics and their history.	
Course content: 1. 1. Characterize and clarify the micro-level, meso-level and macro-level of economic ethics. 2. Define the causality of the rumor, case and media case in the environment of business ethics and the method of solving them based on the principle of Noelle-Neumann's spiral of silence. 3. The development of business ethics in Europe and the USA (Stages of development,	

- comparison of trends) and characterize the ethical and moral context of the issue of profit.
4. Marketing ethics and its importance in business. (Basics of ethical decision-making in marketing. Integration of marketing and ethics, marketing mix and marketing research)
 5. Ethical program of the company. (Business goals and individual freedom. Ethics in the company's internal communication)
 6. Ethics of Buddhism and Hinduism (principle of karma, ideal of man, life cycle)
 7. Ethical humanism of Confucianism and ethics of Taoism (basic values and virtues, comparison of these two directions, ideal of man)
 8. Economic ethics from the point of view of Judaism and Christianity (basic virtues and moral requirements, theories of profit)
 9. Moral teachings of Islam (basic pillars, status of women, theory of profit in Islam)
 10. Psychoanalytic ethical concepts (Sigmund Freud, Erich Fromm, V.E. Frankl)
 11. Contemporary ethics - environmental ethics (A.Leopold, A.Naess, E.Kohák), narrative ethics and principlism, situational ethics (Fletcher, Tillich)
 12. Analysis of ethical problem and ethical dilemma
 13. Models of company management (legal, market-contractual, exploitative, technostructural and stakeholder model)
 14. Define and characterize social groups from the point of view of sociology, their typology and forms of integration - describe the key tools for strengthening corporate identity.
 15. Define organization and organizing, describe characteristic features of organization and power management styles in social organization, their influence on the regulation of relationships in work teams.
 16. Characterize the social stratification of society, graphically illustrate its basic and potentially structured model, while pointing out the supporting factors-criteria for measuring the inclusion and mobility of actors in individual structural layers.
 17. Definition of the term multiculturalism, historical excursion and history of multiculturalism, current currents of multiculturalism and their basic attributes.
 18. Prejudice, stereotype, cultural conflict, cultural identity. Dominant culture and subcultures in Slovakia.
 19. Material and spiritual culture (manifestations of material culture and elements of spiritual culture) Characteristics of concepts in the philosophy of culture (dominant culture, minority culture or subculture, marginal culture)
 20. Socially responsible business. Common characteristics of general ethical principles. Responsible business in three areas. Corporate philanthropy. Corporate citizenship. Stakeholders.
 21. Socially responsible business in the environment of small and medium enterprises. Socially responsible business in the supply chain. Socially responsible business and community support. Socially responsible business and public policy.
 22. Advertising ethics (advertising in accordance with and contrary to morality, criteria of morality in advertising)
 23. Place of relations between ethics and politics, ethics and law, ethics and economics in systematic ethics
 24. Basic concepts of legal theory. Creation of law and sources of law. Interpretation and application of law.
 25. Legal relations. Legal liability. State of law. Law enforcement authorities.

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/OB/20	Course title: Bachelor Thesis (defense) (compulsory, non-profile)
Type, scope and method of educational activity: on-campus	
Number of credits: 10	
Recommended semester: 6.	
Cycle of study: 1.	
Prerequisites: a student has to earn the required number of credits	
<p>Conditions for passing the course:</p> <p>The condition is to write and submit the final version of the final bachelor's thesis, which is prepared on a topic written by the supervisor and approved by the head of the department. The thesis must be original, created by the author, using the indicated information sources and respecting copyright. The required range of 30-40 standard pages without attachments, in a standard formal arrangement, must be observed. It should contain theoretical and possibly application chapter, together with a section on the definition of work methodology and research methods.</p> <p>The bachelor's thesis is submitted in two printed copies, its electronic version, which must be identical to the printed version, is inserted by the student into the final theses registration system in PDF format. The originality of the thesis is assessed in the central register of theses. A report on the originality of the final thesis is drawn up on the result of the originality check. Checking originality is a necessary condition for defense.</p> <p>Part of the submission of the work is the conclusion of a license agreement for the use of the digital copy of the work between the author and the Slovak Republic on behalf of the college/university.</p> <p>The bachelor's thesis is assessed by the supervisor of the bachelor's thesis and the opponent, who prepare assessments according to the established criteria.</p> <p>The Commission for State Examinations will evaluate the progress of the defense in a closed session and decide on the classification. During the classification, it comprehensively assesses the quality of the bachelor's thesis and its defense, taking into account the assessments and the course of the defense, and evaluates it with one common grade. The decision on the result of the defense will be announced by the chairman of the commission together with the result of the relevant state exam for compliance with the rules required by the protection of personal data (GDPR).</p>	
<p>Learning outcomes:</p> <p>The bachelor's thesis verifies mastery of theory and professional terminology, basic standard scientific methods and the level of knowledge that the student acquired during his studies. It demonstrates the ability of independent professional work from a content and formal point of view. The thesis usually brings partial knowledge within the field.</p> <p>Acquired knowledge:</p> <p>The student can independently and creatively use professional sources, analyze and evaluate the current state of the problem in his/her field, synthesize and apply the acquired theoretical knowledge in practical educational activities, adequately choose research procedures and functionally apply them.</p> <p>Acquired skills:</p> <p>The student is able to present and defend his/her professional position on the problems of educational work and to find ways to solve them.</p>	

Acquired competences:

The student is able to demonstrate his/her linguistic and professional culture and his/her own attitude towards professional problems of his/her studies.

Course content:

The thesis defense has a steady course:

1. Introductory speech of the graduate, presentation of the results of the final thesis.
2. Presentation of the main points from the written opinions of the supervisor and the opponent.
3. Answering the questions of the supervisor and the opponent.
4. A professional debate on the thesis with questions to the graduate.

The thesis is available to the committee during the defense. The graduate's introduction should include the following points in particular:

1. Brief justification of the choice of the topic, its topicality, practical benefit.
2. Clarification of the objectives and methodology of the work.
3. The main content issues of the thesis.
4. Conclusions and practical recommendations reached by the graduate.

During the presentation, the graduate has his/her own copy of the thesis or a written introduction. The speech will be delivered separately. It can make use of computer technology. The opening performance should be short, not exceeding ten minutes.

Course description Methodology of Scientific Work

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/MVP/18	Course title: Methodology of scientific work (compulsory elective, non- profile)
Type, scope and method of educational activity: lecture 2 per week on-campus	
Number of credits: 2	
Recommended semester: 1.	
Cycle of study: 1.	
Prerequisites:	
Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. The student receives the evaluation for the preparation of the semester work according to the teacher's assignment. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: semester work (100%) The assessment is carried out according to the classification scale A, B, C, D, E, FX according to the Study Order VŠMP ISM Slovakia in Presov.	
Learning outcomes: The educational outcome is that, after completing the subject, the student is able to write works of a professional and scientific nature, to use and compile knowledge from professional literature. He acquires the skills to apply theoretical knowledge to a specific object of investigation and to use scientific methods. Acquired knowledge: The student defines and explains the basic methodological and methodical starting points for professional work in the humanities and applies them in practice; analyzes and organizes the basic information and knowledge that he works with when planning professional work. Acquired skills: The student accepts the importance of applied research for society. He proposes the topic, goals and hypotheses of creative research, presents the results of his professional work (powerpoint presentation, writing a professional text). Acquired competences: The student has the competence to present and transfer values to work activities and the competence to contribute to the balance in the standardization of rules within civil society. He is ready to actively organize and coordinate the work of expert teams in professional areas.	
Course content: Preparation of written work. Basic stages of preparation of written work. Seminar work. Division of seminar work. The scope of the seminar work. Margins and editing of the page of the seminar work. Seminar paper with cover page. Seminar paper without title page. Abstract and content of the seminar work. The main text of the seminar paper. Citations in seminar papers. The heel in the seminar work. List of used literature - bibliographic references in the seminar work.	

Citation and bibliographic references. References - footnotes. Paraphrases.
Additional notes on writing professional theses. Terminology - correct spelling of some words.
Instructions for writing contributions (professional articles).
Ethics of publishing. Plagiarism.

Course description Cultivating Assertiveness and Empathy

University/College: College of International Business ISM Slovakia in Prešov	
Faculty/ department: Department of Social Sciences	
Code: KSV/VAE/15	Course title: Cultivating Assertiveness and Empathy (compulsory elective, non-profile)
Type, scope and method of educational activity: lecture/seminar 1/1 per week on-campus	
Number of credits: 3	
Recommended semester: 2.	
Cycle of study: 1.	
Prerequisites:	
<p>Conditions for passing the course: During the semester, the student actively participates in lectures, works with the recommended literature and presents his knowledge in the course of a joint discussion. Part of the assessment is the semester work in the form of two micro-written output according to the teacher's assignment and the preparation of a presentation according to the teacher's assignment, the evaluation of which is the final assessment. To successfully pass the subject, you must score at least 51 points = 50% of the success criteria for the EP. Credits will not be awarded to a student who does not meet the required criteria. The final grade consists of the results obtained in the interim assessment. The assessment method consists of: semester work – 2 micro-written output (20%) presentation evaluation (80%) The assessment is carried out according to the classification scale A, B, C, D, E, FX (resp. credited/not credited) according to the Study Order VŠMP ISM Slovakia in Presov.</p>	
<p>Learning outcomes: The student acquires basic communication skills with particular emphasis on assertive and empathic behavior. The subject points out certain methods of assertive behavior, which, however, must be distinguished from aggressive behavior.</p> <p>Acquired knowledge: The student will gain knowledge from psychology about assertiveness, impudence and humility. The student will acquire the necessary knowledge about empathy from the point of view of psychology.</p> <p>Acquired skills: The student can develop a case study on persistence and empathy. The student is able to use assertive behavior techniques.</p> <p>Acquired competences: The student will strengthen their ethical competencies. The student will strengthen his competence in the field of assertive behavior.</p>	
<p>Course content: Introduction to the study subject. Assertive behaviour. Methods of assertive behavior. Assertive behavior techniques. Rules of assertive behavior. Assertiveness and aggressiveness. Assertiveness and passivity. The relationship between assertiveness and empathy. Empathy as an important component of understanding another. Prerequisites of empathy. The relationship between empathy and prosociality. Case studies.</p>
